12. Place shade ( B ) over threaded part of socket ( C ).
13. Tighten socket ring ( A ) back into socket section ( C ) inside of shade ( B ).
14. Screw in bulb into socket section ( C ).

### CLEANING

Do not use polishes or cleaners, just wipe clean with a soft cloth.

### IMPORTANT

The excess cord in the pole should be pulled out from the base of the lamp. You will not be able to push the cord down the pole to remove the extra slack. If the cord is not in place, please adjust it to the right position.

Please note: the cord coming down from the base of the lamp (with the plug on it) is the same one that running down the pole to the base.

### IMPORTANT SAFETY NOTICE

All **3-Way** lamps require certified standard **3-Way** bulbs to operate safely and efficiently.

This lamp suggested bulb is a **3-Way** bulb with 150-Watt maximum standard bulb or equivalent. Bulb type or size is known as A19 with Standard screw in base type of **E26**.

Do not let any material, fabric or paper come in direct contact with the light bulbs. Light bulbs get very hot when in use, allow to cool down before replacing or touching.

**Note: Bulb is not included and is available at Target or Target.com.**

### WARNING

If you install any single watt bulb in a **3-Way** lamp socket, there is a possibility of bulb malfunction leading to danger of fire. We recommend that you visually check every bulb to ensure that you install the correct bulb type. The installation of a single watt bulb into a **3-Way** lamp may cause the lamp damage which can result in fire, electric shock, or other damage. With correct bulbs this **3-Way** lamp will provide you with years of trouble free service.
