CLEANING

Do not use polishes or cleaners, just wipe clean with a soft cloth.

IMPORTANT

This lamp use 150W maximum 3-Way standard bulb or 29W maximum 3-Way listed SBCFL bulb (not included).

The excess cord in the pole should be pulled out from the base (bottom - A) of the lamp. You will not be able to push the cord down the pole to remove the extra slack.

Please note: the cord coming down from the base of the lamp (with the plug on it) is the same one that running down the pole to the base.

IMPORTANT SAFETY NOTICE

All 3-Way lamps require certified standard 3-Way bulbs to operate **safely** and **efficiently**.

WARNING:

If you install any single watt bulb in a 3-way lamp there is a possibility of bulb malfunction leading to danger of fire. We recommend that you visually check every bulb to insure that you install the correct bulb type. The installation of a single watt bulb into a 3-way lamp may cause the lamp damage which can result in fire, electric shock, or other damage. With correct bulbs this 3-way lamp will provide you with years of trouble free service.
